

Automated Deposit Module for Full-Function ATMs

Simplify operations for consumers and branch personnel

Today's consumers are demanding and keeping them satisfied and loyal is critical. With the omnipresence of ATMs, it's more important than ever to provide your customers with fast, efficient, reliable and convenient services. Simplifying cash and check transactions is one way you can improve customer service and reduce operational costs.

The Cummins Allison automated deposit module (ADM) is an option for all of our full-function ATMs, which means this customer-friendly solution can be added to your lobby, walk-up and drive-up environments.

The value of ADM technology

The ADM provides multiple benefits to both the consumer and your FI. It simplifies the deposit process via a single deposit slot that accepts up to 100 bills or 50 checks, the greatest capacity in the industry. Without deposit slips or envelopes, the user-friendly interface leads your customer through the entire transaction, providing instant verification of their deposit. Customers leave the ATM with a receipt displaying images of the checks and a currency count of the cash deposited. And, because ATMs can be available 24/7, your customers can conduct their business when they want to, confident their transactions have been completed quickly and securely.

Simplify operations

Branch personnel appreciate the value of the ADM, because it significantly reduces the time spent handling manual transactions – even high volume transactions. Tellers and other staff can spend more time with customers, growing your business. Advanced scanning technology ensures high read rates for

both cash and checks, resulting in reliable performance with minimal intervention. Our full-function ATMs are ADM upgradable, meaning you can add this functionality whenever the time is right for you.

Cummins Allison ATMs equipped with ADM are:

- **Easy to use** – Large deposit receptacle, simple user interface, and excellent read rates mean your customers will have a positive experience with your institution.
- **Easy to service** – Uptime is critical to maintaining customer satisfaction and revenue generating activities. Reliable performance, easy-to-service equipment and local support is part of our heritage.
- **Easy to upgrade** – Buy what you need today, knowing that you can easily upgrade your ATM when the time is right.
- **Easy on your budget** – High quality, reliable and built to last, our units are also extremely affordable.

Our nationwide network of local sales and service teams stand behind all our products, so you know you'll get the prompt, local support you can count on.

Automated Deposit Module Features

Simplify transactions for both customers and staff by adding ADMs to your ATM channel. Customers will complete transactions quickly and leave with:

- A receipt that displays all check images and their value.
- A count of all cash denominations that were deposited.
- Totals for the transaction.

Checks and cash are stored in a secure, separate, locked location so you can confidentially manage processing. Sophisticated sensors help prevent suspect bills from entering your operation at a point of vulnerability.

ADMs allow you to migrate deposit processing away from the teller line, enabling improved customer service, while driving cost out of your branch operation.

Single slot document receptacle

Accepts up to 100 bills or 50 checks per transaction. Automatic document alignment feature reads and processes documents regardless of orientation.

Reject compartment capacity

Up to 60 items

Document retract compartment capacity

100 items

Cassette storage

Two removable locking units with a capacity of 2,000 documents each. Optional free-fall cabinet with 4,000 document capacity.

MICR reader and amount recognition (CAR/LAR)

E13B or CMC7

Check image quality

200 x 200 dpi. OCR image processing.

Transaction receipt data

Front of deposited checks, check values, individual cash denomination values, total deposit value, and other transaction data.

Escrow

Holds documents until cardholder decides to confirm or cancel the deposit. 100 bill and 50 check capacity.
