**all in less than two minutes!**

- *Faster*
- *More Accurate*
- *Improved Loss Prevention*

*Shown with optional Space-Saving System.*

**MADE IN USA**

# Cash Till Processing

The entire operation is simplified and walks the operator through easy and clear instructions. Processing your tills has never been easier.

**1** A JetSort® coin sorter featuring a special hopper takes coins directly from a till.

**2** The Till Refill Kit sorts coins back into their respective coin till areas. This reduces coin deposit fees, as well as rolled coin purchases.

**3** The JetScan™ currency scanner quickly counts the mixed currency (no presorting required) and transfers the count to the JetSort providing you with one concise batch report.

In a fraction of the time previously spent, your till has been processed, float amounts are set, and deposits are prepared.

## Receive detailed reports of cash count

At the end of every drawer processing procedure, two print-outs provide detailed information on the coin and currency count by denomination. Also, the system prompts for manual entry of any:

- Float amounts
- Skims
- Rolled coin
- Other items (coupons, checks)

Everything is detailed, totaled and set up for your bank deposit and filing purposes.

# How much time can be saved?

| | Manual Process | Cummins System |
|---|---|---|
| Time it takes to balance cash drawer *(in minutes): | 10 | 2 |
| Number of drawers daily per location: | x 15 | x 15 |
| Time spent counting drawers daily: | 150 minutes | 30 minutes |

*\* Based on timed observation in fast-food restaurant environment*

| | Manual Process | Cummins System |
|---|---|---|
| Time it takes to do a drop (in minutes): | 45 | 15 |
| Number of daily deposits per store: | x 3 | x 3 |
| Time spent counting deposits daily: | 135 minutes | 45 minutes |

**Time savings using the Cummins Cash Drawer Processing System:**

**SAVINGS:**

## 3 hours, 30 Minutes Per Day!

**Provides efficiency, security and more time to manage your business.**

## Benefits of the Cummins Cash Drawer Processing System

- **Dramatically reduce cash drawer processing time**
  In less than 2 minutes, a cash drawer is counted and balanced. Manual counts can take five times longer, depending on the amount in the till.

- **Increase count accuracy & eliminate human error**
  The accuracy of Cummins coin and currency processing equipment is time-tested and proven in hundreds of thousands of installations.

- **Improve loss prevention**
  The combination of equipment accuracy, reduced time that employees have the cash drawers, and the drawer identification printed out on the reconciliation receipt provides an extremely high level of accountability.

- **Reduce deposit drop time**
  Floats, skims, rolled coin and totals are all easily entered, making quick work of deposit drops.

- **Reduce coin deposit fees**
  As coins are counted by the JetSort, they are returned into the correct coin slot in the same drawer. Coin is recycled, saving on fees for coin deposits and rolled coin purchases.

- **More time to devote to customers and mission-critical tasks**
  With less time devoted to counting and balancing cash drawers, you and your employees can devote more time to the primary job: providing excellent service to your customers.

## CA  Cummins Cash Drawer Processing System

Cummins-Allison is a leading manufacturer of high-speed coin and currency sorting and counting equipment. Since 1887, Cummins has been supplying innovative and useful products that recognize and meet our customers' needs. Much has changed since Cummins-Allison started in 1887, but our dedication to providing customers with top quality products, backed by exceptional service, remains the cornerstone of our company.
