Series 6000

CUMMINS

# JetSort®

Cummins JetSort® coin sorters have set the world standard through superior quality and customer service. Sorting requirements differ widely among applications and industries, and the extensive line of JetSort coin sorters allows you to choose the model that best meets your needs.

The JetSort display makes information easy to see and understand.

**MADE IN  
USA**

## High Speed Coin Sorters for any application

### Experience the benefits:

- **Unsurpassed accuracy** of 99.995%.
- **Uncompromised quality** with speeds of up to 10,000 dimes per minute.
- **Cost-effective**, adaptable solutions to coin sorting with an architecture that lets you choose the capabilities you need.
- **Reliability** due to rigorous manufacturing, expert planning and design and experienced installation and maintenance.

### EXACT BAG STOPS

JetSort is the only high speed coin sorter that stops on the exact count – every time. Simply set each bag to the amount you want processed, with no more adjustments or manual shifting of coins from bag to bag. Each denomination can be set for varying quantities and changed on demand.

### DUAL BAG

To accommodate frequently used denomination demands and allow for longer processing times, dual bag models are available in the 6000 Series.

### User-Friendly

To simplify training and operation, most JetSorts are equipped with an easy-to-use, comprehensive control panel with both traditional keys and illuminated display. This ensures that regular, as well as infrequent users can operate the JetSort flawlessly.

Control panel combines traditional keytops and illuminated panel. To simplify training, the touchscreen shows only keys that can be used.

This is the screen after a sub-batch of \$323.75 has been processed. The operator can press any of the keys on the display or the other control keytops.

To determine the value of quarters currently in the bag, the operator simply presses the "BAG" and the "25c" keys on the display... \$133.75 is the answer. For a count of coins, he/she would touch the "Unit" key.

This shows the display for bag stop settings. The quarter bag currently has been set for 4,000 quarters. When the 4,000th quarter enters the bag, JetSort will stop exactly on the quantity!

## JetSort Models

		COUNTING SPEED	NUMBER OF COINS	
	JetSort 2000	Counter Top	Up to 3,600	6 Standard
	JetSort 3000	Counter Top	Up to 4,500	6 Standard - Up to 7
	JetSort 4000	Floor Unit	Up to 4,500	6 Standard - Up to 8
	JetSort 6000	Floor Unit	Up to 10,000	6 Standard - Up to 9

## 50,000,000 Coin Warranty

Manufactured in the U.S. under rigorous specifications, JetSort sorting disks are warranted to process 50,000,000 coins in most applications.

## Complete Processing Systems

For faster, comprehensive processing, each Cummins JetSort can be interfaced with Cummins currency equipment to combine coin and currency totals in a single printout and/or transmission to your computer.

When you add it all up, it comes down to this: whether you need a smaller machine to process a minimal amount of coin periodically, or one that can handle a multitude of large volumes regularly, JetSort delivers unmatched performance, efficiency and reliability.

## The JetSort<sup>®</sup> Advantage –

---

***Only  
one  
moving  
part!***

The basic concept is the same in all JetSort models – only one moving part touches the coin. Using a patented sorting mechanism, a circular black rubber pad moves the coins against the non-moving steel sorting disk.

Optional large capacity lift tray pours coins quickly and neatly into sorter.

## Specifications\*

Accuracy: 99.995%

Coins: 1¢, 5¢, 10¢, 25¢, 50¢, \$1 SBA

## Dimensions:

**2000:** 19.6" W x 20.5" D x 18.5" H

**3000:** 19.6" W x 20.5" D x 18.5" H (with inspection tray)  
19.6" W x 20.5" D x 22.5" H (with lift tray)

**4000:** 22.5" W x 23" D x 38.15" H (with inspection tray)  
22.5" W x 23" D x 42.5" H (with lift tray)

**6000:** 26.25" W x 23.5" D x 42.25" H

**Power:** Voltage operating ranges are either 105-130v or 198-253v. Frequency is 50/60Hz. Customer must provide an electrical supply properly grounded and protected by a circuit breaker in accordance with applicable electrical code. This equipment must be plugged into a properly grounded outlet. To ensure the proper operation of this equipment, a separate circuit serving only this device may be required for the 4000 or 6000 Series.

Power consumption (full load amps) at nominal voltage:

2000 Series: 6.0 Amps (120v); 3.0 Amps (220v)

3000, 4000 & 6000 Series: 9.0 Amps (120v); 4.5 Amps (220v)

Power disruptions that result in input voltage other than the power requirements listed can lead to improper operation of this device or result in failure/damage to electrical components. (Power disruptions are not covered under machine warranty or preventative maintenance agreement.) Power conditioning/stabilizing devices are available through Cummins.

## Options & Accessories

Configured to meet your specific requirements with a variety of options and accessories, JetSort's capabilities are limitless.

**Electronic Options Kits:** A wide variety of added capabilities enhance your JetSort.

**Coin Lift Tray:** JetSort trays facilitate coin processing.

**Printers:** Provides permanent and easy to read record of coin processing.

**Remote Display:** Large LED display of totals for customer viewing.

**Security Doors:** Restricts access to coin bags (varies by model).

JetSort 2000 Series with optional stand and security doors.

## LOCAL SERVICE & WARRANTY SUPPORT

Warranty and maintenance of Cummins products are handled locally. Cummins has factory employees in over 50 North American cities plus selected dealers in additional locations. This assures you of prompt, professional and local support.

## JetSort® 1000 Series

JetSort is also available in a small to fit anywhere model that is big in capabilities and options.
